Even the Louisville Commercial is not without a pack upon its back. The Lex-ington Statesman, true to the legitimate rural instinct, is horrified because, as the rural instinct, is horrified because, as the Commercial explains, "we have ideas of our own." We are not so sure about that. If the white folks in the South were all of a piece with the Chicago carpet-baggers who went down there—

"To git some on 'em offis. An' some on 'em votes," we dare say the scheme would be ruinous. But they are not. War is a great teacher and, among other things, it taught Southern men and women who had never known work before, to know it well, to do it well, and to endure it, if they do not love it. The best blood and brains of the South are now at work, and have been for five years. The negroes, the carpet-baggers, and the scalawags only are idle, for they alone are pampered by government. We want to reduce them to the level of their neighbors. That is all. level of their neighbors. That is all,

The Radical policy of reconstruction did the mischief in the first place. It devised a plan which took a purely domestic question out of the hands of those whose immediate presence and interests qualified them to deal with it best, and it transferred this domestic question to the keep-ing of ignorant and, in most cases, corrupt and designing persons, who misused their trust, and inflected damage upon the whites and the blacks in an almost equal There are now in active service on the borders of Texas eleven companies of mounted men, making an aggregate of 500 officers and men. Several of those who were a little while ago denouncing the Counten-Journar, because it urged the revision of our rules of evidence so as to bring the negro into the State Courts of Kantucky and relieve the white people of the disadvantage which pressed upon them in the United States Court, are now saying, "Well, we'll concede testimony, but that is the last concession we'll make."

When will the politicans of Kentucky vaken up to the fact that in this matte they are biting their nose to spite their ace, and without so much as the pretext of right on their side?
